

Barrier free drainage solutions

ACO Bathroom Drainage

ACO. creating the future of drainage

The worldwide ACO Group. A strong family you can build on.

The ACO Group is a world market leader in drainage technology. Climate change sets us a challenge to react effectively with innovative solutions to new environmental conditions. With its integrated approach, ACO stands for professional drainage, efficient cleaning, and the controlled discharge or reuse of water. Products include drainage channels and drains, oil and grease separators, backflow stop systems, pumps and pressure-water-tight cellar windows and light shafts.

The family-owned company headquartered in Rendsburg/Büdelsdorf, Germany, was founded in 1946 on the site of the Carlshütte foundry – Schleswig-Holstein's first industrial company. It still has very strong roots in the region. The innovation strength of the ACO Group is built on intense research and development, and its technical expertise in processing polymer concrete, plastic, cast iron, stainless steel and reinforced concrete.

ACO ShowerDrain

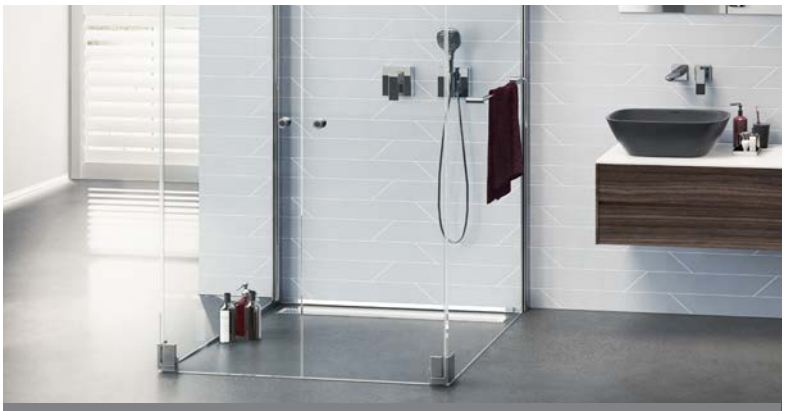

Products for each requirement

Hotel, wellness and spa

ACO ShowerDrain Public optimizes the creation of generously sized, uniform bathrooms, designed without any interruptions, changes in material or barriers.

- Premium products with short delivery time
- Flexibility in design
- Maximum safety, load class K3 and easy to clean

Residential and public buildings

Due to the variety of ACO ShowerDrains, ACO has solutions for virtually all structural challenges required and various installation heights to a channel with a vertical outlet.

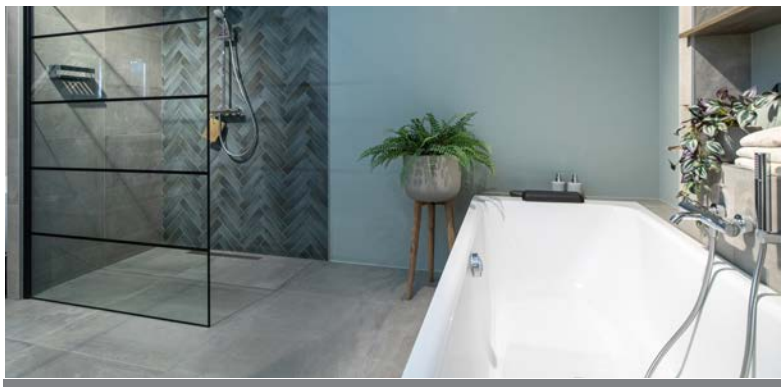

- Various installation heights
- Modular systems

Health and care

To improve hygiene together with a superior finish, ACO offers electro polished channels and gratings.

- Guarantees maximum safety and hygiene
- Quick and easy cleaning
- Low maintenance requirements

Barrier-free design

ACO ShowerDrain - a design statement. Whether on the wall, in the centre of the shower or with individually engraved gratings. Let your imagination run wild.

- Variety of design options
- Safe and easy to install
- Easy handling

Hygiene benefits and durability

Manufactured to an extremly high standard, ACOs range of channels and gratings is perfect in relation to hygiene, operational safety and durability regarding product life.

- High-alloy stainless steel
- Completely pre-assembled or modular systems
- Plane welding seams for easy cleaning

Design

There is a wide range of styles to choose from, so you never need to compromise performance for design. For added piece of mind, customers also get access to our sales team who provide expert advice to specifiers and installers.

- Customized solution available
- Drainage solutions from scratch

ACO ShowerDrain C

Powerful, robust, easy to clean!

For developers and architects who prioritize long-term considerations, the ACO ShowerDrain offers a prudent luxury choice with a strong emphasis on reliability. Every aspect of this product can be trusted, from its smooth passivated surfaces that ensure secure drainage and hygiene in bathrooms, to its seals, joints, and material thickness that guarantee minimal noise emissions.

ACO ShowerDrain C is the object channel from ACO Building Drainage and stands for modern design and perfect functionality. The basis is the high-quality stainless steel used to manufacture the shower channel itself, the gully and the design grate.

The ShowerDrain is a shower floor channel that seamlessly blends form and function. It serves as an ideal solution for high-end bathrooms featuring elegant glass fixtures and natural stone floors.

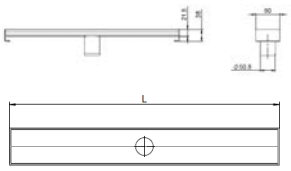

ACO ShowerDrain C

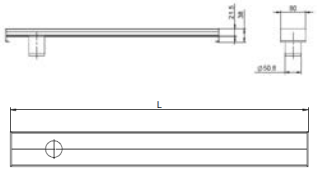

Product benefits

- Material: Stainless steel 316
- Load class: K3
- Pickle Passivated Surface, Suitable for Bare foot area
- Depth 21 mm
- Outlet type: Vertical, DN50 at the Center / End
- Flowrate: 1.0l/s
- Grating Designs: Quadratto, Wave and Tile (10mm)
- Customizable lengths upto 2400mm

ACO ShowerDrain M+

Everything is made simple by just turning!

ACO ShowerDrain is a high-quality choice that offers a reliable, aesthetically pleasing, and functional solution for a range of applications. Its focus on detail, from its luxurious design to its practical features, makes it a trusted option for those looking to create long-lasting and visually appealing bathroom spaces.

The ACO ShowerDrain M+ is equipped with 360° rotatable gully body. You can also select between four gullies to suit the installation situation, providing great flexibility and easy installation right from the start.

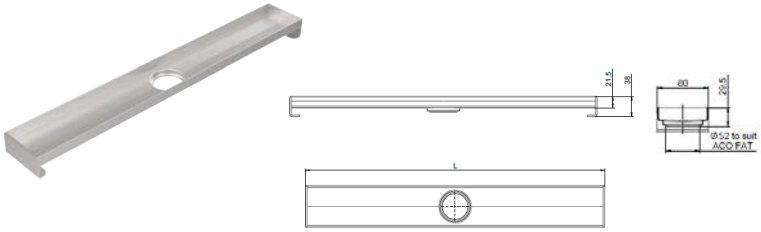

The ACO ShowerDrain M+ can be adapted to installation heights of up to 56 mm. Round shapes and flat surfaces ensure both a harmonious design and easy cleaning. The surface is also particularly resistant to cleaning agents. The odour trap allows free pipe access and thus easy cleaning.

ACO ShowerDrain M+

Product benefits

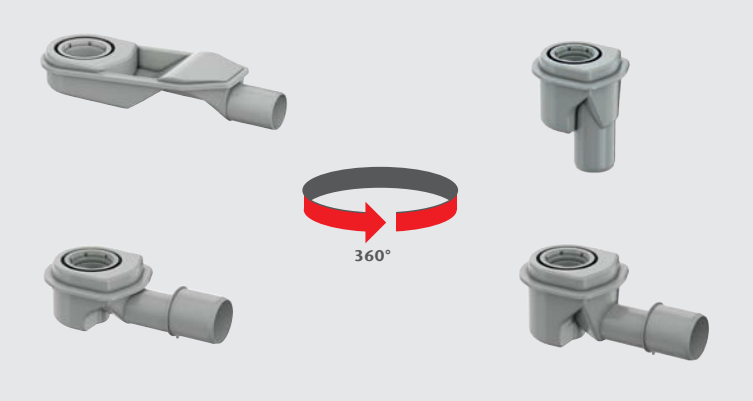

- Material: Stainless steel 316
- Load class: K3
- Electropolish
- Depth 21 mm + gully body (Plastic)
- Outlet type: Vertical / horizontal, DN40/50 at the center
- With water seal of 50mm
- Flowrate: 1.0l/s
- Grating Designs: Quadratto, Wave and Tile (10mm)
- Customizable lengths upto 2400mm

Gully + Foul Air Trap for ShowerDrain M+

Injected seal

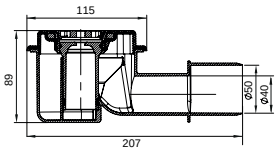

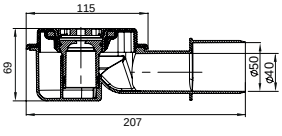

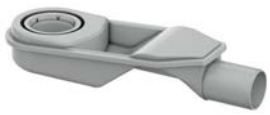

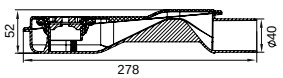

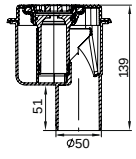

▲ During installation and beyond the period of usage, a permanently tight connection of all components is very important. Therefore, all gully bodies are equipped with a permanently injected seal. This ensures that the seal is not accidentally lost or can slip during installation.

Flexible alignable gully

◀ The ACO ShowerDrain M+ can be combined with four different gully bodies to make it suitable for the installation situa-tion. The gully body of the ACO Shower-Drain M+ can be flexibly aligned accor-ding to the course of the drainage pipe. Screwed in the middle, the gully body is therefore a secure, force-locked connection that holds the gully securely in position after installation.

ACO. we care for water

Intelligent drainage systems from ACO increasingly use smart technology to ensure that rainwater and wastewater are drained, or temporarily stored. With innovative separation and filter technology, we prevent water contamination. We accept the challenge of reusing water, and thus establishing a resource-saving cycle.
