

ACO Access Covers

ACO Access Covers

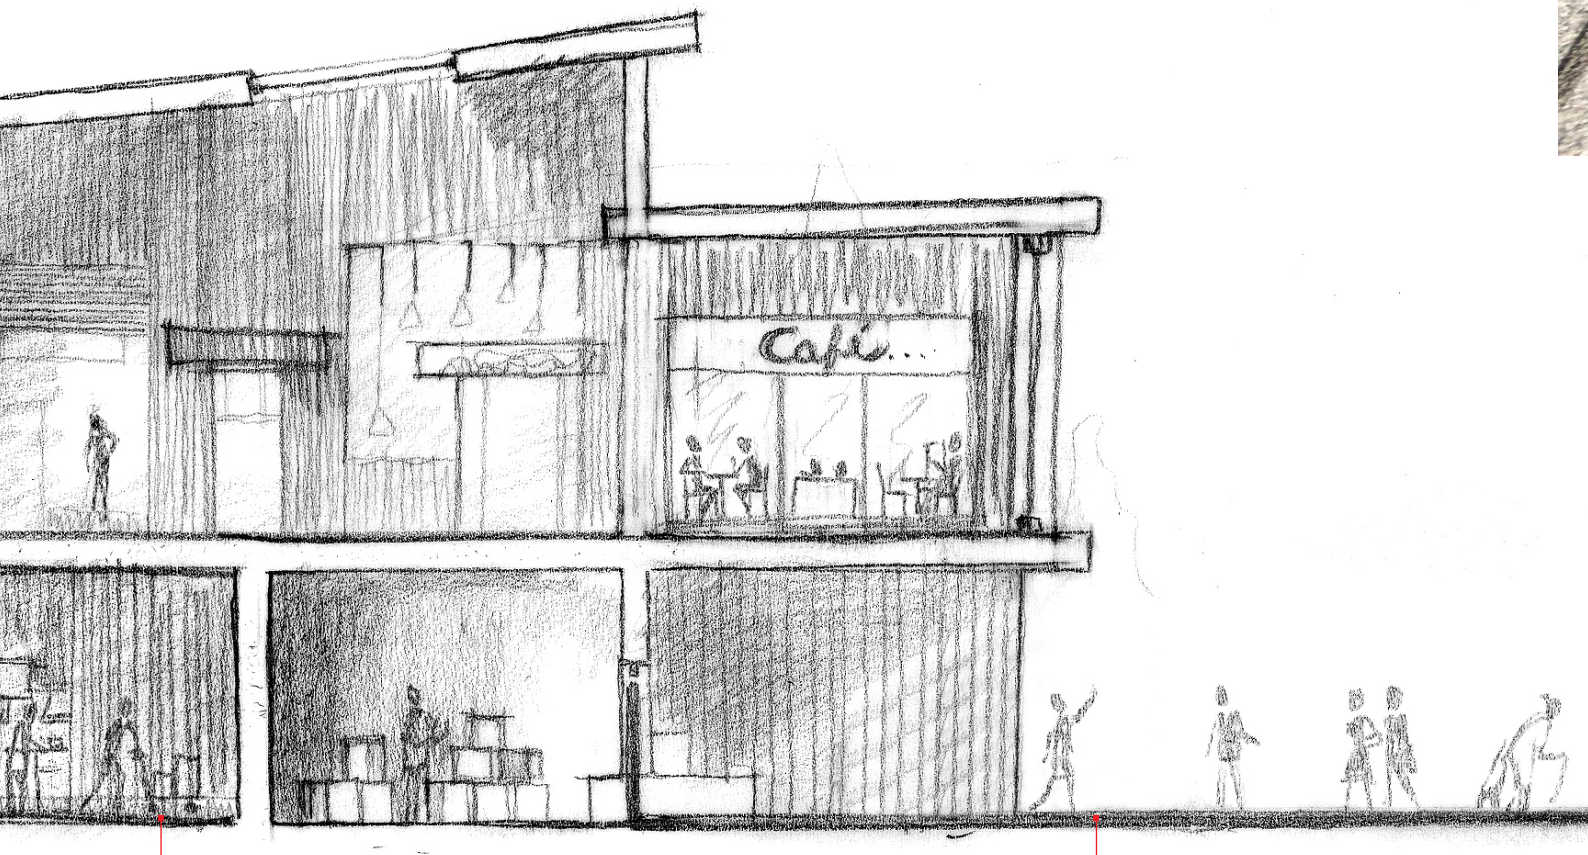

We at ACO Industries have many years of experience in designing access covers. We use our broad technical knowledge in product design, testing, manufacturing and applications to deliver maximum quality to our customers. ACO Access Covers are innovative and made of high quality materials. Our complete range of covers is fully certified according to European standards and meets all load, safety and functional requirements.

The precise manufacture of stainless steel, aluminium composites guarantees high reliability and long life of our products.

- Stainless steel is suitable for application in meat, bevera-ge, chemical or food industry.
- Covers made of Stainless steel are typical for residential buildings, as well as for production and storage building
- Aluminum covers for demanding applications such as in hotels and hospitals will complete the program.

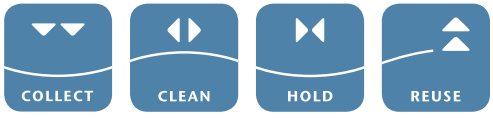

ACO Access Covers can be flexibly installed into any interior or exterior areas. Their installation and handling, as well as their maintenance and cleaning, are easy.

A wide range of standard types with many options, tailor made production and the possibility of using various floor surfaces make an ACO Access Cover look like an inconspicuous chameleon smartly merging into its background while retaining its full functionality and safety.

ACO Access Cover UNIFACE

ACO Access Cover PAVING

ACO Water Cycle

ACO Access Cover

Product information

Typical applications are inside buildings or in building surroundings, where high level of design is required.

Recessed access covers are suitable for installing paver blocks and tiles

The cover must be filled-up with concrete of required quality (M30/35) in order to achieve declared load capacity.

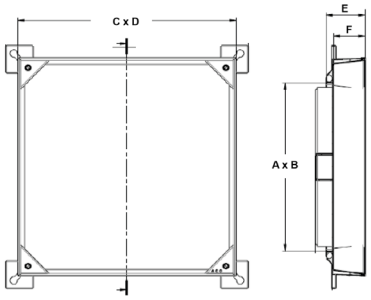

- Type tested and certified according to EN 1253-4
- Bolt locked – child safety
- Corrosion resistant
- Small corner parts
- Secure installation – good connection with concrete (profiled frame or anchors)
- Discreet product after installation
- Easy tool for opening and manipulation
- Water-tight and odour-tight tested according to EN 1253-4

ACO Access Cover PAVING SS

Product information

- Meets declared load class up to D400 for all clear openings up to 1 m
- Easy opening after installation
- Less friction between frame and cover
- No sharp edges – improved safety
- Material SS 304

- Thanks to unique bending on the top no additional stripes for installation necessary
- Rolled profiles for stainless steel version are made from conventional steel sheet in thickness 2 mm.
- Covers are sealed for excellent water- and odour-tightness.
- Preciseness, design

SS - pickle passivated stainless steel (1.4301)

ACO Access Cover UNIFACE AL

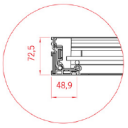

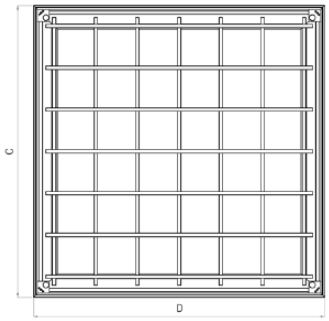

Product information

- Excellent optic aesthetics
- Meets declared load class up to M 125
- Corrosion resistant aluminium alloy
- Precision thanks to crimping (mechanical fixing)
- Easy opening – prevents blockage
- Easy installation – positioning of the cover in frame

- Tiny tolerances, perfect fit
- Very small corner parts (30×30 mm)
- Brass nut to prevent blockage
- Reinforcement in optimal position
- 2+1 sealing – water/odour tight+sand/ dust tight

ACO Access Cover LIFTER

Product information

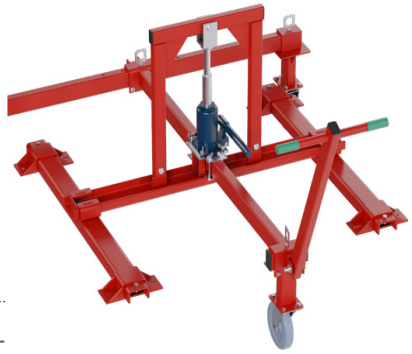

- Transport and operation-friendly device
- Convenient and stable manipulation by one person
- Designed for lifting ACO Access Covers
- Adjustable lifting height - from 0 mm up to 270 mm
- No special crane required on site
- Lifting weights other than ACO Access Covers is not permitted!

ACO Access Covers applications

300 mm – 1000 mm (Axis XY)

- Max. dimensions: 1000x1000 mm
- Max. load: 6000N (**no homologation**)

Weight [kg]	Part No.
192	451117

ACO. we care for water

Intelligent drainage systems from ACO ensure the proper diversion or storage of rainwater and wastewater. With innovative separation and filtration technology, we prevent water contamination. We embrace the challenge of water reuse to secure a resource-efficient cycle.
